## Laundry Washing & Spinning Machine

### Basic Features

- The inner and outer drum, glazed inspection cover and outer cover panels, are made of AISI 304 Quality 18/8 CR-NI stainless steel.
- There is a leak prevention, custom-made gasket in the machine door. Further, it's ensured that the machine doesn't work when its door is open, and the door of a working machine won't open due to the door locking system.
- The machine is controlled by an electronic digital display mounted on the front control panel. Although there are 25 fixed programs on the machine, it provides unlimited optional programs and electricity, water and time saving.
- There is a safety system which makes the machine stop automatically, for the purpose of preventing damage because of a vibration that could occur, arising from an unforeseen cause during operation.
- It provides minimum vibration and balance, thanks to the improved spring, damper and pulley system.
